

Fabricio Cunha

Frontend Developer

CAREER OBJECTIVES

As a React Frontend Developer, my goal is to leverage my expertise in building dynamic and responsive user interfaces to create immersive and engaging web applications. I aim to contribute my technical skills and creative mindset to collaborate with a talented team and deliver high-quality software solutions that meet the needs of users and clients. I am passionate about staying up-to-date with the latest trends and best practices in frontend development, and I am committed to continuous learning and improvement. By joining a forward-thinking organization, I aim to make a meaningful impact and play a vital role in crafting cutting-edge applications that drive innovation and exceed user expectations.

SKILLS

- Teamwork
- Problem-Solving
- Design Thinking
- HTML
- CSS
- Tailwind
- JavaScript
- Typescript
- React JS
- Remix JS
- Redux
- GraphQL
- Agile
- SEO
- Git
- GitHub

WORK EXPERIENCE

FRONTEND DEVELOPER AT SPRING

2021-2023

Spring is a tech startup based in London that focuses on buying and selling refurbished tech, creating a more sustainable way of how we consume and engage with technology, and reducing the amount of tech that goes to landfill. You can find out more here; spring.co.uk

- I am a motivated and adaptable professional with a strong background in web development. My journey began in Spring when I joined a dynamic team that utilized a React and TypeScript stack, incorporating Redux, GraphQL, and Material UI. While this technology stack was efficient, we encountered challenges with search engine optimization (SEO). To address this issue, our CTO made the strategic decision to transition to Remix JS, a framework known for its SEO-friendly features and server-side rendering capabilities. Additionally, we embraced Tailwind CSS for efficient and streamlined styling.
- Throughout this process, I demonstrated proficiency in front-end development, leveraging React, TypeScript, Redux, and GraphQL to build robust and interactive web applications. I also acquired expertise in Remix JS and effectively utilized server-side rendering techniques to optimize the website's performance and search engine visibility.
- Recently, I spearheaded the integration of Sentry into our website, further enhancing our development and quality assurance processes. By implementing Sentry, we gained valuable insights into error tracking and monitoring, allowing us to proactively identify and resolve issues. This integration significantly improved our ability to identify and address errors promptly, ensuring a seamless user experience for our customers.

FREELANCER WEB DEVELOPER

2020-2021

- As a dedicated freelancer, I have gained valuable experience in creating websites for multiple clients while pursuing my studies in frontend development. With a strong passion for web design and an eagerness to learn and grow in this field, I have developed a diverse set of skills that enable me to create visually appealing and user-friendly websites.
- During my time as a freelancer, I collaborated closely with clients to understand their unique requirements and translate their vision into functional websites.

EDUCATION

THE COMPLETE 2020 WEB DEVELOPMENT BOOTCAMP

Udemy | 05/2020

- Full-stack development

COMPLETE REACT DEVELOPER IN 2020 W REDUX, HOOKS, GRAPHQL
